**M.E.SCHUPP Industriekeramik GmbH & Co. KG will invest in the strong partnership to customers and cooperation partners.**

Aachen, March 2006.

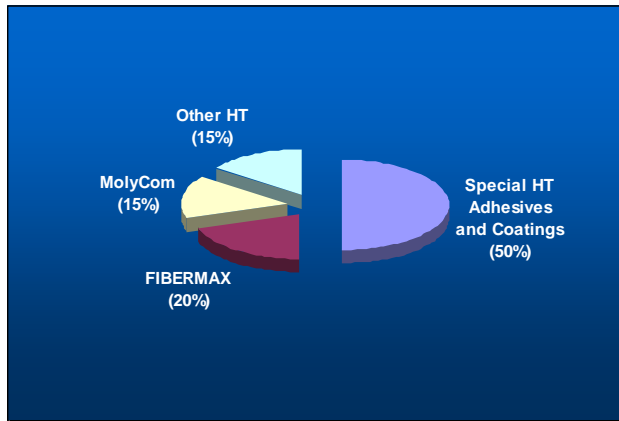

The M.E.SCHUPP Industriekeramik GmbH & Co. KG headquartered in Aachen provides ceramic and metallic key components in the high temperature sector for industrial and laboratory furnaces up to 1.900°C. The company is focused on supporting the special needs and requests of SME´s as a specialized and family-owned enterprise since its foundation 10 years ago. Therefore all business processes are created as simple as possible, so that the order administration can be handled rapidly, reliably and economically. The customer will stand to benefit from flexible and well-rehearsed teams as well as quick cycle times, which causes a fair and constructive working on equal terms.

The customers, which are mainly SME´s, choose M.E.SCHUPP as a real alternative supplier to market dominating companies or as a „second source“ in the following areas: electrical heating, thermal insulation, temperature measuring by ceramics (PTCR rings) as well as sintering (Setters) and melting (plasma ceramic crucibles). This range of products stands for High-End-Technology combined with best quality at competitive prices. To be able to realise these advantages, M.E.SCHUPP will invest about 1.6 Million Euro in new production lines from 2005 to 2007. Additionally the company had doubled its staff since 2004.

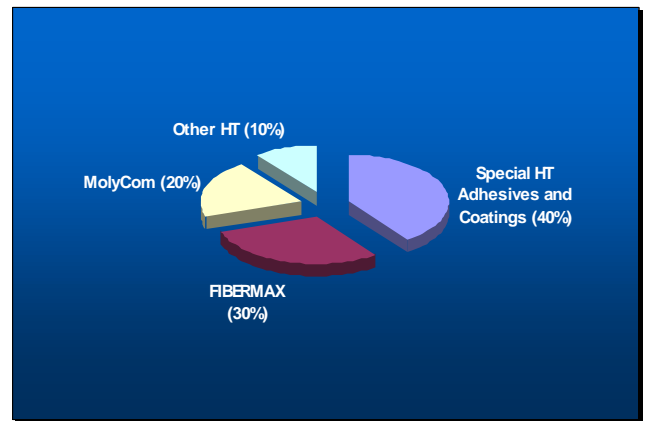

Together with the international und renowned partner: ITM, ISOLITE, IWATANI and FERRO M.E.SCHUPP is planning to turn over 8 Million Euro with 35 employees in 2008:

Spreading of turnover for 2006

Spreading of turnover for 2007

Solely High Quality and High End products for competitive prices
